

Unified per-cell parameter distributions across four channels

Box summaries (median, IQR, 10–90% whiskers) overlay groups with $n \geq 5$; every cell/patch/condition is shown as a point.

a–d, g: complete QC-passed public record (SI S9). e, f, h, i: pre-registered pharmacology arms; drug-naïve and drug-treated shown separately (SI S7 arm table).
